

RHINOSITE

An aerial photograph of a construction site. In the foreground, there are two large, rectangular concrete structures under construction. The ground is dirt and covered with various construction materials, including wooden planks, metal beams, and yellow safety barriers. A green forklift is visible on the left. A large, semi-transparent red geometric shape, resembling a stylized 'R' or a rhinoceros head, is overlaid on the right side of the image. The text 'CAPABILITY STATEMENT' is written in white, bold, sans-serif font across the bottom of the image.

**CAPABILITY
STATEMENT**

We improve life
on site for thousands
of Australians in
construction

How we achieve it

Consolidated site establishment

Delivery, fit off, and fit out of site facilities. Installation of walkways, signage, mud control etc.

A single contact

Everyone on site knows there is one number to call with any questions, issues or requirements regarding the compound.

Responsive

You have the confidence that the RhinoSite team will respond to any requirements within 2hrs

Never run out of essential supplies

We make sure there's always sufficient stock of safety, cleaning, lunchroom and office consumables on site.

One invoice each month

One invoice for hire, consumables and services.

High quality facility access, furniture & appliances

We believe that the office and lunchroom equipment on a construction site should be no less quality than in a high-rise mid-city office.

What We Do

We take the stress & hassle out of setting up your site compound. From assisting with planning, to hire & supply, installation and even servicing it for the duration of your project.

Our vision

Your team can arrive onsite and get straight into work, with zero lost time on setting up the Site Compound.

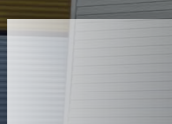

01 Site Compound Planning

02 Facility & Equipment Hire

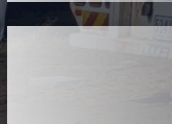

03 Installation, Fit Off & Fit Out

04 Critical Consumables Supply

05 Ongoing Service

06 Demobilisation & Packdown

Life's better on a RhinoSite

RHINOSITE

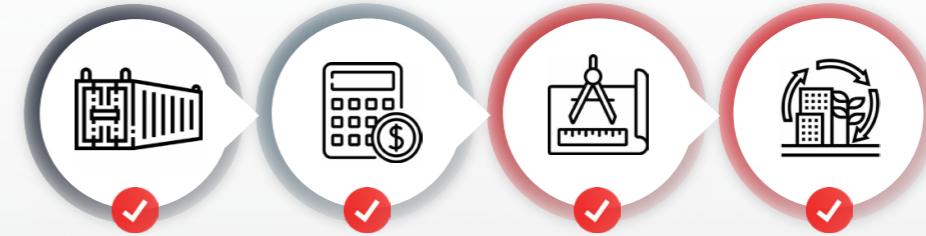

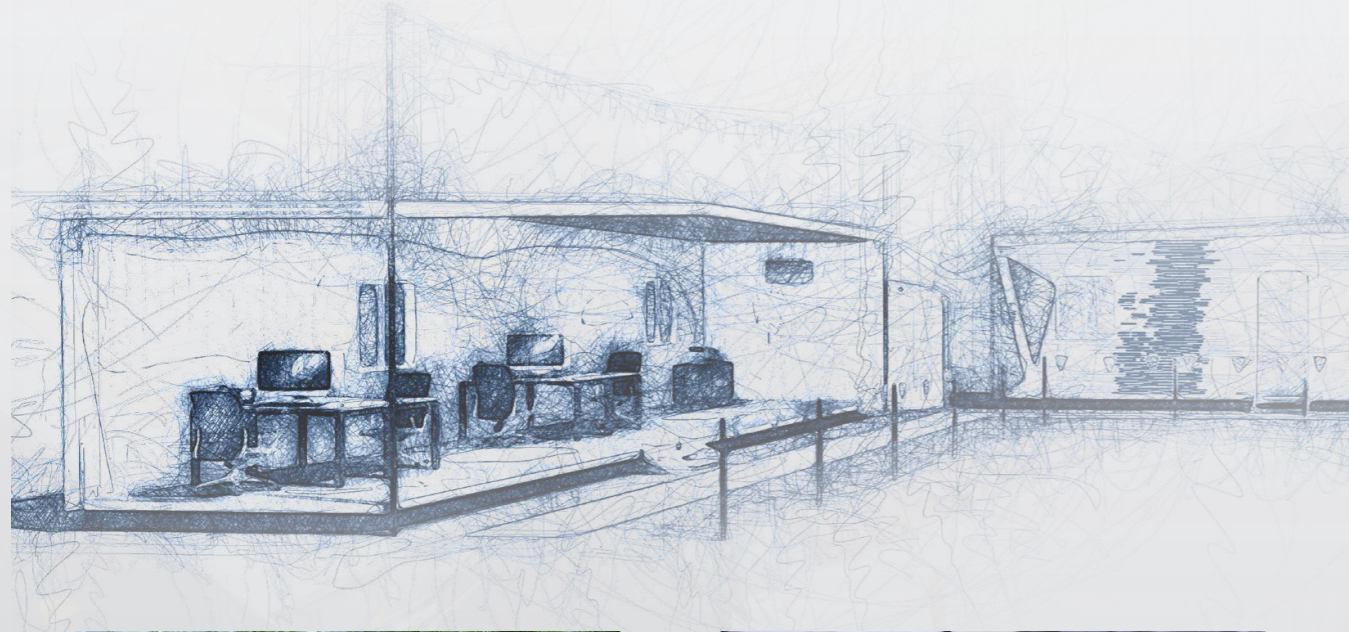

RhinoSite is an Australian owned, family business operating from Melbourne. Prior to RhinoSite, our founders worked in construction servicing sites ranging from metro school builds to maintenance shutdowns on large oil refineries and power plants. We found across most sites there was a lot of hassle and distraction to teams caused by setting up and maintaining site compounds and supporting services.

We set out to **revolutionize** the traditional site compound, making them a cleaner, safer and more productive space for every worker and visitor on the site - while improving cost efficiency.

Site Compound Planning

“ We don’t ‘wing it.’ ”

The RhinoSite team will work with you to plan the site establishment for each project across 4 main categories:

Facilities/Amenities

Calculating the correct space and supporting services required for the quantity of personnel, etc.

Cost

Complete cost estimate of install, fit out and supporting services through the life of the project.

Compound Layout

3D modeling & detailed dimensional plans.

Sustainability

Sustainability improvement strategies, including temporary power, consumables & waste management.

Equipment Hire

The team at RhinoSite can assist with the hire & installation of any temporary facilities & equipment required, including:

01 Portable buildings

02 Furniture & appliances

03 Fencing & barriers

04 Energy systems: solar, generators

05 Mud control

06 Potable water supply systems

07 Septic waste management systems

08 Facility access systems

09 Site storage systems

Installation & Fit Off

Our vision is to hand over a fully functioning Site Compound.

We'll make sure everything is installed, fitted off and ready for your team to walk in and start the project. There's nothing worse than the lost time from a team who are distracted at the start of the project with setting up the facilities!

We will take care of

Covered walkways

Plumbing connection

Electrical connection & lighting

Installation of Safety Signage

Set up & fit out of offices & lunchrooms

Safe and Effective Mud Control

Life's better on a RhinoSite

RhinoSite Mud Grate

Making mud grates safer, more effective and more presentable

- ✓ Safe: no sharp or pointy edges, fully welded
- ✓ Tidy appearance
- ✓ Durable design
- ✓ Made In Melbourne, from Australian steel
- ✓ 1000mm x 500mm x 75mm

Site Mat

Creating clean, designated pedestrian walkways

- ✓ Neat alternative to crushed rock
- ✓ Reusable: can be washed out
- ✓ Highlights a designated pedestrian walkway
- ✓ 10m x 1.2m x 15mm

RhinoSupply

Critical Consumables Supply & Management

RhinoSite provide a fully stocked cabinet free of charge. We cover at least 90% of supplies required at the compound.

This means your team can arrive on site with all required supplies already there.

Stock is checked and replenished monthly.

The range includes:

PPE Site Safety Washroom	Office Lunchroom

- ✓ Only Pay for what you use
- ✓ Spend less time off site: no last minute runs to town for supplies.
- ✓ One monthly invoice for consumables.
- ✓ Competitive rates: 5% price beat guarantee
- ✓ Replenished monthly
- ✓ Never overorder
- ✓ Secure: provided with lock and keys
- ✓ Never run out of critical supplies

Ongoing Services

Now all that's done and your project starts, you have one point of contact and we'll take care of the ongoing services:

Septic Waste Management

Hard Waste Management

Fresh Water Supply

Electrical Test/Tag

Facility Cleaning Schedules

Safety Audits

Fire Extinguisher Inspections

A RhinoSite compound is a cleaner, safer, and more productive space.
