**One system,
flexible outcomes**

**Ground column options
for exposed walkways**

RhinoSite's temporary walkway shelter system is available in 3 meter modules for a perfect fit across all standard 6m & 12m portable buildings. Modules can be easily joined to cater for any length of walkway, varied building sizes and exposed walkways. The strong, galvanized steel frame is positioned and secured with wire lock pins before tensioning using a unique heavy duty fabric cover and nylon ratchet straps to achieve a robust solution.

**Adjustable column & roof
footing placement**

**Width & Height
Capabilities**

Next steps
